Senior Data Engineer – AWS/Python/Pyspark/SQL

Description

We are looking for a motivated and enthusiastic Trainee Data Engineer to join our dynamic team. This is an excellent opportunity for recent graduates or individuals looking to start their career in data engineering.

Experience Required: 3+ Experience

Job location: Madurai/Chennai/Trichy

Mode: Work from Office

Responsibilities

Key Responsibilities:

- Assist in the design, development, and maintenance of data pipelines and ETL processes.
- Work with large datasets using AWS services such as S3, Redshift, and Lambda.
- Develop and maintain data integration workflows using Python and PySpark.
- Write efficient SQL queries to extract, transform, and load data.
- Collaborate with data scientists, analysts, and other stakeholders to understand data requirements.
- Ensure data quality and integrity through regular monitoring and validation.
- Participate in code reviews and contribute to the improvement of data engineering practices.

Qualifications

Qualifications:

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- Basic understanding of AWS services and cloud computing concepts.
- Proficiency in Python programming.
- Familiarity with PySpark for big data processing.
- Knowledge of SQL and experience with relational databases.
- Understanding of ETL concepts and data integration techniques.
- Strong problem-solving skills and attention to detail.
- Excellent communication and teamwork abilities.

Preferred Skills:

- Experience with version control systems like Git.
- Familiarity with data visualization tools such as Tableau or Power BI.
- Understanding of data warehousing concepts.
- Exposure to machine learning and data analytics.
